### SUMMARY

I'm a full-stack developer with strong expertise in Laravel for building robust APIs and managing complex data with MySQL. I create dynamic single-page applications using Laravel Livewire and also have a solid foundation in React.js for building scalable, component-based frontends. My skillset enables me to deliver complete, efficient, and user-friendly web application solutions.

### KEY SKILLS

|                                 |  |
|---------------------------------|--|
| <b>Backend &amp; Frameworks</b> | Laravel, PHP, RESTful APIs, Eloquent, MVC Architecture, Composer                                     |
| <b>Frontend &amp; UI</b>        | React JS, Livewire, Alpine JS, JavaScript (ES6+), JQUERY, HTML & CSS (Sass, Tailwind CSS, BOOTSTRAP) |
| <b>Databases &amp; Tools</b>    | MySQL, PostgreSQL, Redis, Queue Management, Cron Jobs  |
| <b>Version Control</b>          | MySQL, Redis, Queue Management, Cron Jobs  |
| <b>Testing</b>                  | PHPUnit (Basic), Unit Testing  |

### WORK EXPERIENCE

|                                 |                           |
|---------------------------------|---------------------------|
| <b>Senior Laravel Developer</b> | <b>Jul 2024 – current</b> |
|                                 | <b>Apexvim</b>            |

I have 2.5+ years of Laravel experience and have been working as a Backend Developer on the Niobi Banking App since June 2023. I handle end-to-end backend development, including RESTful APIs, queue and cron jobs, complex business logic, and integrations. I work extensively with Laravel's core features to deliver efficient and scalable solutions.

|                             |                           |
|-----------------------------|---------------------------|
| <b>Full Stack Developer</b> | <b>Jun 2023- Oct 2024</b> |
|                             | <b>Software System</b>    |

I have worked on both frontend and backend development tasks, including creating responsive user interfaces, integrating APIs, optimizing performance, and ensuring smooth end-to-end functionality across the entire application.

|                                  |                           |
|----------------------------------|---------------------------|
| <b>Intern Frontend Developer</b> | <b>Dec 2022- May 2023</b> |
|                                  | <b>Software System</b>    |

I completed an internship at Software System Technologies, where I gained hands-on experience in frontend development. During this time, I deepened my understanding of UI/UX principles and honed my skills in building responsive and interactive interfaces.

### EDUCATION

|   |                                 |
|---|---------------------------------|
| <b>Bachelor's in Software Engineering</b> | <b>FSc – Faculty of Science</b> |
| 2024 – 2028                               | 2019 – 2021                     |
